RE: Letter of Reference

To whom it may concern,

I have had the pleasure of working with Danny for the last 10 years. We have worked together on major construction projects which have been the recipient of National and Local award winning construction honors for which Danny has procured and installed window wall, curtain wall, glass balcony's, ornamental metal, lobby entry ways and decorative interior trim.

Danny brings to each project a professional persona including engineering, shop drawings, fabrication and installation talents that are second to none. The ability to foresee problems with design intent and application of the installation is one of Danny's strengths. Many times Danny has been able to review design details and provide alternate insight which has led to the design being executed while maintaining the integrity of the original design.

Procurement of materials and installation of same is a streamlined process when working with Danny. The hands on approach and interactive communication with manufacturers and his installer's results in the roadmap Danny presents when awarded a project come to fruition.

I would use Danny time and time again.

If you have any further questions or need additional information please feel free to call me at 6465230271.

Sincerely,

DCBE, INC.

Thomas Morris, Principal
